- Blaser 7X64 Barrel
- Blaser 9.3X62 Barrel
- Blaser 458LOTT Safari
- Blaser 300WIN Barrel

Optical aids include:

- **RIFLESCOPES:** Burris laser scope - a telescope with a laser range finder which measures the distance and illuminates aiming point.
- **NIGHT VISION RIFLESCOPE:** Pulsar 870 - a sophisticated scope using long range IR illuminators to see in total darkness (range approximately 300 - 400 meters). Apart from other hi-tech features, this scope also has an integrated laser range finder for a better orientation (range 400 meters).
- **THERMAL VISION RIFLESCOPE:** Apex 50 - It has a detection range of approximately 1.5 km. It works by measuring thermal differences, with three operating modes, each designed to deliver the best possible image in specific viewing conditions. Ideal for night hunting or day hunting in low-light conditions, tall grass or dense forest.
- **OBSERVATION USING THERMOVISION:** It is used to track the animal during low-light conditions or at night. Aimed object must be at least partially uncovered (gap between grass or bushes, leaves etc.).

When you choose black powder rifle hunting, you will get a replica of a historical black powder rifle to hunt with. The ballistics of this rifle limits the hunter to a close shot. With a black powder rifle one has to get within a 50m range from the specie to have an accurate shot.

Available Rental Archery Equipment

Compound Bows available include:

- Hoyt Carbon Element G3
- Hoyt Spyder Thirty
- Craze Junior
